

ADACO Services – Eclipse/CMS

JK Technosoft’s Role

JKT was also occupied in modifications and enhancements in Progress application. JKT was involved in the migration process of the Adaco’s existing client-server based architecture with additional functionalities.

About the Company

Adaco Services LLC, an Amherst software company provides software solutions to the hospitality market. It helps hotels around the world process more than USD 2 billion in procurement this year alone. Some of their major clients are Hyatt hotels, Starwood hotels and Cornell University.

Application Details

The existing application was developed on ADM2 technology.

JK Technosoft is involved in the migration process of Adaco’s existing client-server based architecture into web-based software with some more additional functionality likes Automated Routing, Vendor Managed Quotes and Licensing (there is some limitations with the existing one) and Concurrency.

Basically this application is divided into parts namely CMS and ECLIPSE

CMS – It would run in the Corporate Office and used to control the applications (Eclipse) running in client’s different locations (Branches).

Modules implemented under CMS are:

- Admin
- Maintenance
- Vendor Quotations
- Purchase
- Interface to Accounting System
- MIS Reports

ECLIPSE – This would run in Client locations and would also help in Procurement activity, Control Inventory and Supplies.

Modules implemented under Eclipse are:

- Admin
- Maintenance
- Vendor Quotations
- Purchase
- Receiving
- Inventory
- Recipes
- Interface to Accounting System
- Track Sales through POS Integration
- MIS Reports

Business Benefits

- JKT also took the opportunity to prepare Detailed Design Documents to be used by open technology development team.
- A major key benefits was in terms of money saving.
