

Our Vision

“To be a globally respected organization obsessed with customer delight and growth, driven by a passionate team.”

JK Technosoft (JKT) is a global software & solutions company that is driven by the simple yet powerful tenet of providing ‘total customer satisfaction’. A valuable asset of the JK Organization, one of India’s largest industrial groups with an annual turnover exceeding US\$ 4 billion, JKT is at the leading edge of comprehensive IT services & solutions.

Since its inception in 1994, JKT has achieved exceptional growth. Over 650 top rung professionals, ISO 9001 certification, development centres in Noida (Delhi/NCR) and Bangalore, a sales office in Mumbai and 100% subsidiary companies based in UK and USA - are a testimony to this. JKT has nurtured an exclusive client roster spread across Europe, USA, Australia and Asia-Pacific.

JK ORGANIZATION

JK Organization, founded over a 100 years ago, is one of India’s largest industrial groups with an annual turnover exceeding US\$ 4 billion. A forerunner in the economic and social advancement of India, it is a conglomerate of over 70 industrial & commercial companies and charitable trusts. Its member companies employing nearly 50,000 people, are engaged in the manufacture of a variety of products and in diverse fields of commerce.

Besides serving the nation, JK Organization has also undertaken industrial ventures in other countries. Trusts are devoted to promote industrial, technical and medical research, education, religious values along with providing better living and recreational facilities.

SERVICES

We pioneer a 360-degree approach towards our clients’ needs that is business-advantage driven.

1. Enterprise Solutions: We provide enterprise solutions to suit the client’s IT needs & business requirements. We offer:

- ERP Consultancy - We provide ERP consulting services to study, map, implement, audit and redefine your processes through our comprehensive business understanding.
- SAP Services - We provide SAP services in the areas of business modeling, ABAP, BASIS and application helpdesk. We also offer post implementation support and migration services.
- MFG/PRO Services - With our rich experience and expertise in this space we offer tailored services in the areas of full-cycle implementation, version migrations, application roll out etc. We also provide customized interface development and support services.

2. Progress Consulting: We specialize in Progress technology and offer consultancy on the complete suite of Progress products. We provide bespoke development on all versions of the Progress toolset including OpenEdge 10, WebSpeed & Sonic. Having one of the largest pool of Progress skilled resources in Asia, we have the capability to re-engineer, migrate, localize, support & maintain any Progress based application available across the industry in any geography.

3. Application Management: With our domain & technology expertise in a wide variety of areas, we help end users improve and optimize their business performance. Our services include full cycle implementation, development, maintenance

& support, migration, help desk (L1/L2), UI design services, independent testing, and process consulting.

4. Product Management: We help our clients engineer their products with a broad range of services over all the stages of product life cycle. Working in a collaborative engagement, we offer our expertise to our clients to work as their extended arm in product development, product sustenance, UI designing, reverse engineering and QA.

5. Independent Testing: We provide functional & non-functional testing services to our clients that aim to derive maximum value out of their investment. We offer software testing and test automation services through our dedicated offshore test labs. However, we can also engage with our clients in the BOT (build, operate & transfer) mode.

6. Professional Services: We provide our clients the advantage of having greater flexibility and easy access to skills & manpower through our professional services, which span across a wide spectrum of latest technologies.

7. Training: Our comprehensive portfolio of IT Training Programs help executives at all levels to acquire and maintain functional and other competencies, and to improve and optimize individual and organizational IT skills.

INDUSTRIES

We operate across all major industry verticals and constantly leverage our industry knowledge to provide unique customized solutions to our clients.

1. Healthcare

We offer a comprehensive suite of services focusing on the entire healthcare value chain including global providers, payers, life sciences,

pharmaceuticals and government/non-profit healthcare organizations. We help our clients streamline their operations, improve patient care and efficiency, build data for research and management control and meet regulatory compliances. We provide services to automate their processes, enhance their customer experience and manage clinical data exchanges. Having operated in the industry for years, we leverage our experience to offer cost-effective solutions and services to our clients.

2. Manufacturing

We help global manufacturing companies improve their operational efficiencies in today's highly dynamic business environment. Our capabilities include plant automation which streamlines & optimizes production processes and provides a robust framework for global SCM and CRM.

3. Retail

We help our clients to create the new retail value paradigm, where the physical store is just one of the channels through which goods, services and experiences are sold. We bring in our expertise to offer the best possible use of technology, processes and domain knowledge to our clients, which in-turn helps them in enhancing their supply chain efficiency. With special focus on e-retailing, we help our clients to improve intercommunication within their business and trading partners.

PRODUCTS

We provide highly competitive business-focused technology products through innovative application of technology.

Our Products

1. Hospital Management System (HMS)

JKT has developed this product exclusively for hospitals, which is a fully integrated management system that caters to the clinical, administrative and financial needs of hospitals. The system provides comprehensive data security to prevent un-authorized user access. This product is already implemented successfully in hospitals across the world.

2. Human Resource Management System (HRMS)

JKT has developed this product exclusively for the HR function. The product addresses all major

functional areas including recruitment, induction, establishment, training, payroll management etc. with a comprehensive workflow.

TECHNOLOGIES

- Progress Technologies (Progress 4GL, ChUI, GUI, ADM, ADM2, Appserver, Dynamics, OE10, WebSpeed, Sonic)
- Java Technologies (J2EE, Servlets, Swings, Beans, Application Server etc.)
- Microsoft Technologies (.Net, C++, Visual Basic etc.)
- Oracle Development Suite
- SAP Technologies (Functional, Technical and Net Dimension solutions)

OUR VALUE PROPOSITION

- A complete portfolio of solutions & services integrating rich experience, domain knowledge and technology expertise
- Global Delivery Capability
- Flexible Resource Deployment
- Mature Development Methodologies
- Rapid Enterprise Applications Development using Agile in distributed development environment
- Openness to Risk & Reward sharing

CUSTOMER SPEAK

“ In JKT we have found a real partner who will continue to help us enhance our competitive advantage. ”

Richard Wainwright,
Product Strategy Director,
VT Software Solutions
